

Hussain Nader Mohsen

Software Engineer | Full Stack & Mobile Developer

Bahraini | +973-36065303 | hussain.nader.it@gmail.com | [GitHub](#)

Professional Summary

Aspiring full stack and mobile developer with hands-on experience building modern, scalable applications using React, React Native, TypeScript, Node.js, Go, MongoDB, PostgreSQL, and REST/GraphQL APIs. Graduate of the General Assembly Software Engineering bootcamp with solid experience in building end-to-end full stack applications. Currently completing a Bachelor's in Programming at Bahrain Polytechnic and developing a real-world mobile application for Reboot01, involving React Native, GraphQL, Supabase, and custom Golang middleware services. Passionate about building real world digital solutions.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Java, C#, Go
 - **Frameworks & Libraries:** React.js, React Native, Express.js, Node.js, Django, .NET, Bootstrap, EJS
 - **Databases:** PostgreSQL, SQL Server, MySQL, MongoDB, Supabas, FireBase
 - **Mobile Development:** React Native, Expo
 - **Backend & APIs:** REST APIs, GraphQL APIs, Go middleware services
-

Languages

- **Arabic:** Native
 - **English:** Fluent
-

Projects

MERN Full-Stack Projects — General Assembly Bootcamp

- Learned to build full MERN stack applications with full CRUD functionality
- Implemented JWT authentication, MongoDB schemas, and Express APIs
- Developed React frontends using reusable components

Reboot01 Student App — React Native (TypeScript), GraphQL, Supabase, Go

- Developing a full production-level mobile application for Reboot01 Institution, built from scratch using React Native (TypeScript) and Expo.
- Integrated GraphQL APIs to fetch student information, programs, and platform data securely.
- Designed and developed a custom Go based middleware REST API responsible for handling push notifications and core application logic.
- Implemented push notification services using Expo Notifications Service integrated with Go backend.
- Implemented database storage using Supabase.
- Implemented JWT authentication with Reboot01 GraphQL API, securely storing tokens in Expo SecureStore (Keychain/Keystore).
- Integrated biometric fingerprint attendance via BioTime API, syncing check-in/out events with the app securely.

ASP.NET + Windows Forms + SQL Full System — University Project

- Developed a full stack rental management system for a camera shop as a group project
- ASP.NET website for customers to browse and rent products.
- .NET Windows Form desktop application for admins to manage rentals, inventory, and accounts.
- Integrated a local SQL Server database for storing customers, rentals, and product inventory.

Education

Bachelor in Programming, Bahrain Polytechnic — **Expected May 2026**

Software Engineering Immersive Bootcamp, General Assembly — **Oct 2024 to May 2025**

Additional Programs

- Full Stack Development Program (In Progress) — Reboot01 Institution

Awards

- **Bahrain National Team** — 3rd Place, Arab Cross Country Running Championship (2023)
- **Batelco Night Duathlon** — 1st Place (Team), 2nd Place (Individual) — 2023
